

Our strategies feature a **goal-oriented, tactical, disciplined** approach specifically engineered to reduce volatility while achieving satisfying returns over a market cycle.

## Ocean Park's Investment Philosophy

Ocean Park Asset Management is a pioneer in the pursuit of absolute return goals, meaning pursuing positive returns across a market cycle, regardless of traditional benchmark movements. Our investment results are created by identifying potential sources of return, informed by decades of data and experience, to attempt to increase total return while managing downside risk. Each of our programs employs a rigorous sell discipline that attempts to keep our clients out of trouble. As part of our integrated risk-management discipline, each holding is monitored daily to limit drawdowns. Our proprietary stop-loss approach has been used since inception of the firm in 1988. Our programs are not passive buy and hold approaches; they are dynamic and flexible, creating resiliency in up and down markets.
