

INVESTMENT OBJECTIVES

The Ocean Park Balanced Risk Model has two investment objectives: to provide long-term total return and to limit volatility and downside risk. The Strategy's multi-asset diversification strategy employs unusually broad diversification across asset classes, markets, industries and issuers. A passive "buy and hold" strategy is not employed. As part of an integrated risk-management discipline, the Strategy monitors underlying holdings daily and applies a trailing stop discipline to each holding, based on a proprietary approach, to limit the impact of any sustained decline in a given asset class or holding. The overall asset allocation of the Strategy is not fixed. It can and does change significantly over time, re-allocating the portfolio in response to trend changes in the U.S. and global economy and in various investment markets.

† The benchmark for the Ocean Park Balanced Risk Model is the Morningstar Allocation – 15% to 30% Equity Category, which is comprised of portfolios which seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures between 15% and 30%. One cannot invest directly in an index or category, and unmanaged index or category returns do not reflect any fees, expenses, or sales charges.

One cannot invest directly in an index or category, and unmanaged index or category returns do not reflect any fees, expenses, or sales charges.

‡ The performance is presented net of the highest FTJ FundChoice asset based fee of 0.45% annually and an assumed advisory fee of 1.00% annually. Combined, these fees amount to 1.45% annually and are deducted on a monthly basis. Because clients will have different fee arrangements and specific investments in the strategy may be made at different times, net performance for any individual client will vary from the net performance stated herein. FTJ FundChoice requires the Ocean Park Balanced Risk Model to maintain a minimum of 2% of the portfolio's value in cash. Allocations to cash may affect the portfolio's performance.

The inception date of the Ocean Park Conservative Allocation Program is January 1, 1995.

The performance quoted herein represents past performance. Past performance does not guarantee future results. Performance history prior to March 1, 2015 is: From 1/1/1995 to 12/31/1998, from a marker SMA account invested in the same way as the Ocean Park Conservative Allocation Program but managed by an affiliate of Ocean Park. From 1/1/1999 to 3/31/2013, from a marker SMA account invested in the same way as the Ocean Park Conservative Allocation Program and managed by Ocean Park. From 4/1/2013 to 3/1/2015, from a marker SMA account invested in the same way as the Ocean Park Conservative Allocation Program but managed by an affiliate of Ocean Park.

Performance shown after March 1, 2015 is that which was achieved in the Ocean Park Balanced Risk Model available at FTJ FundChoice.

The SMA marker accounts from 1/1/2008 to 12/31/2011 were allocated up to 20% to a mutual fund managed by an affiliate of Ocean Park. The SMA marker accounts and the composite from 1/1/2012 to 3/1/2015 have been allocated up to 50% to mutual funds managed by an affiliate of Ocean Park. **The Ocean Park Balanced Risk Model may be allocated up to 65% to mutual funds managed by an affiliate of Ocean Park Asset Management, Inc.** Allocations to those mutual funds began on January 1, 2008, January 1, 2012 and February 27, 2019, respectively.
