

INVESTMENT OBJECTIVES

The Ocean Park Balanced Risk Model has two investment objectives: to provide long-term total return and to limit volatility and downside risk. The Strategy's multi-asset diversification strategy employs unusually broad diversification across asset classes, markets, industries and issuers. A passive "buy and hold" strategy is not employed. As part of an integrated risk-management discipline, the Strategy monitors underlying holdings daily and applies a trailing stop discipline to each holding, based on a proprietary approach, to limit the impact of any sustained decline in a given asset class or holding. The overall asset allocation of the Strategy is not fixed. It can and does change significantly over time, re-allocating the portfolio in response to trend changes in the U.S. and global economy and in various investment markets.

Holdings and Asset Allocation are subject to change.

¹The benchmark for the Ocean Park Balanced Risk Model is the Morningstar Allocation – 15% to 30% Equity Category, which is comprised of portfolios which seek to provide both income and capital appreciation by investing in multiple asset classes, including stocks, bonds, and cash. These portfolios are dominated by domestic holdings and have equity exposures between 15% and 30%. One cannot invest directly in an index or category, and unmanaged index or category returns do not reflect any fees, expenses, or sales charges.

One cannot invest directly in an index or category, and unmanaged index or category returns do not reflect any fees, expenses, or sales charges.

The "Growth of \$100,000 – After Fees" graph and the "Quarterly Performance – After Fees" chart show the performance which was achieved in the Ocean Park (or an affiliate) Conservative Allocation Program marker SMA accounts managed in the same way as the Ocean Park Balanced Risk Model from 1/1/1995 to 2/28/2015. Since 3/1/2015, the source of the performance data is the Ocean Park Balanced Risk Model available at Orion Portfolio Solutions. The performance presented is net of the highest Orion Portfolio Solutions asset-based fee of 0.45% and an assumed advisory fee of 1.0% for a total annual fee rate of 1.45% which is calculated and deducted on a monthly basis. U.S. Dollars are the currency used to express performance results.

From 4/1/2013 to 2/28/2015, the source of the performance data is from a marker SMA account managed by an affiliate of Ocean Park in the same way as the Ocean Park Balanced Risk Model. From 1/1/1999 to 3/31/2013, from a marker SMA account managed in the same way as the Ocean Park Balanced Risk Model by Ocean Park. From 1/1/1995 to 12/31/1998, from a marker SMA account managed by an affiliate of Ocean Park in the same way as the Ocean Park Balanced Risk Model.

The net performance data shown reflects reinvestment of dividends but will vary from the net results for each client due to different fee arrangements charged by any brokerage firm involved and the financial advisor. Specific investments in the Model may be made at different times and into different holdings.

Orion Portfolio Solutions requires the Ocean Park Balanced Risk Model to maintain a minimum of 2% of the portfolio's value in cash which may affect the portfolio's performance.

Since 1/1/2008, the SMA marker accounts, which represent the Ocean Park Balanced Risk Model, have been allocated to mutual funds managed by an affiliate of Ocean Park.

The performance data does represent the impact that material economic and market factors had on the investment manager's decision-making. The performance shown represents past performance. Past performance does not guarantee future results. All investments involve risk, including loss of principal.
