

Disciplined Risk **Management**

Outcomes Delivered by a Truly Tactical, Rules-Based Process

Company Overview

Sierra Investment Management established in

1987

by David C. Wright, JD and Kenneth L. Sleeper, MBA, PhD

In 1987, Sierra's founders developed a differentiated approach to portfolio risk management. Today, the firm continues its aim of growing client wealth by focusing on the following objectives:

- 1 Participate opportunistically in global investment uptrends while
- 2 Using a tactical discipline to help limit downside risk.

Our Investment Philosophy

▶ A Tactical Approach

From day one, the intent of our tactical approach has not been aimed at beating “buy and hold.” We believe that many investors – and entire sides of portfolios – can appreciate and benefit from a layer of risk management via the daily, tactical management of assets.

▶ Consistency Through Discipline

We believe a manager’s process must be implemented consistently – not in frequent reaction to market news. We do not buy and sell on tips and hunches, nor do we make investment decisions on a case-by-case basis. A consistent investment process, rooted in disciplined risk management, is our hallmark.

▶ Rules-Based Decisions

Rules – not predictions nor emotions – drive our investment decisions. We believe the key to successful, long-term outcomes is to manage money with as little personal input as possible, and our objective process is rooted in decades of research and quantitative analysis.

▶ Listening to Clients

Our firm’s early experience showed that clients cared most about avoiding large portfolio losses measured by maximum drawdown. Still today, we make it our priority to pursue the management of downside risk for our clients through a disciplined process.

▶ Seeking to Provide Stability in Downturns

In times of high emotion and volatility, we believe we can help clients avoid potentially damaging portfolio decisions. We have served our clients through some of the most severe financial storms, including the 2008 financial crisis, the COVID-19 pandemic, and the 2022 market and bond sell-offs.

The Outcomes We Achieve are the result of a truly tactical, rules-based process.

For more than 35 years, we've implemented a proprietary, tactical, rules-based investment process with the objective of helping minimize severe drawdowns for clients. We're proud to be recognized for our efforts by significant industry leaders.

Our Process:

Rules-Based Buying and Selling

We believe every investment manager should be able to answer the questions “When do you buy?” “What do you buy?” and “When do you sell?” Our clear answers to these questions form the foundation of a tactical approach that has served investors for more than 35 years.

WHEN TO BUY

Trend Following

- We evaluate buying opportunities when our quantitative decision rules identify an uptrend in the price of a security.
- An uptrend is determined by a security's price rising above both the recent low of its upper band and a secondary moving average.
- A security's bands are related to its historic volatility and are offset above and below a short-term exponential moving average.

WHAT TO BUY

Security Selection

- We seek to buy securities exhibiting strong risk-adjusted returns during a recent uptrend.
- Additional metrics, such as strength of the recent uptrend, historical volatility, and correlation to existing holdings, are considered in portfolio construction.
- If there are multiple securities with buy signals in the same asset class, preference is towards buying securities with better, recent risk-adjusted performance.
- For multi-asset-class portfolios, if there are a number of securities with buy signals across different asset classes, risk and diversification are also considered, with the goal of preventing one asset class from having an outsized impact on the portfolio.

WHEN TO SELL

Trailing Stop Discipline

- We will sell a security when our quantitative decision rules identify a downtrend in the price of a security.
- A downtrend is determined by a security's price falling below the recent high of its lower band – an event which triggers a sell signal.
- Our Trailing Stop Discipline seeks to limit the impact of a further decline in value of a security on the overall portfolio.
- Our Trailing Stop Discipline is applied across positions in each of our managed portfolios and monitored daily.
- When a position is sold, we may keep the proceeds in cash or buy another security.

Our Process Includes These Tenets

Broad Diversification

We offer solutions that can address a range of investor goals across the risk spectrum and have the ability to invest in a wide range of investment categories. We seek opportunities across global equity and fixed income markets, as well as alternative investments. We also offer targeted asset class solutions using diversified holdings with the goal of meeting specific targeted objectives.

An Objective of Limiting Drawdowns

While we can't control the markets, we can seek to manage the risk of drawdowns through a tactical, rules-based investment process that includes daily portfolio monitoring and a proprietary Trailing Stop Discipline.

Ability to Move to 100% Cash Exposure

In times of turbulence and in absence of uptrends across our target investment opportunity set, our strategies can have up to 100% in cash exposure.

Investing in Pooled Vehicles

We believe that utilizing pooled vehicles, such as mutual funds, in our portfolios helps provide us with an efficient means for quickly entering and exiting the market when we receive our Buy or Sell Signals. Pooled vehicles can also help provide broader diversification across a smaller number of holdings.

Past performance does not guarantee future results and there is no guarantee that any investment strategy will achieve its objectives, generate profits, or avoid losses. Diversification does not ensure a profit or protect against a loss in a declining market.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Sierra Mutual Funds. This and other information about the Fund are contained in the prospectus and should be read carefully before investing. The prospectus can be obtained by calling toll free 1-866-738-4363 (1-866-RETI-FND). The Sierra Mutual Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC.

Ocean Park Asset Management, Inc. ("Ocean Park") is an SEC registered investment adviser. Registration does not imply a certain level of skill or training. For information pertaining to the registration status of Ocean Park, please call 1-844-727-1813 or refer to the Investment Adviser Public Disclosure website (www.adviserinfo.sec.gov).

Sierra Investment Management, Inc., Ocean Park Asset Management LLC, and Ocean Park Asset Management, Inc. are not affiliated with Northern Lights Distributors, LLC.

Ocean Park Asset Management LLC is advisor to the Sierra Mutual Funds.

Trailing Stop Discipline ("Discipline"). This proprietary Discipline has the objective of limiting the magnitude for portfolio drawdowns. The Discipline is based on a manual process that defines sell levels/signals for security holdings in decline, as measured by its price falling below the recent high of its lower band. These are not market orders. Ocean Park utilizes this Discipline directly in the management of non-affiliated holdings. Ocean Park invests in its affiliated Sierra Mutual Funds ("Funds") and the Discipline is applied at the Underlying Funds level, not on the Funds themselves. Please see our Form ADV Part 2A for information on conflicts of interest that exist as a result of Ocean Park investing in affiliated Funds..

Cash Exposure. In the absence of buy signals, and/or temporarily following a sell signal, portfolios can have exposure to 100% cash and cash equivalent asset classes. Because our affiliated Funds utilize the same discipline, the Underlying Holdings of any Fund can also have cash exposure. Cash exposure in Ocean Park portfolios therefore considers both the direct cash exposure as well as the cash exposure within the affiliated Funds.
