*Based on monthly data

†Annualized performance data begins the first full calendar year of inception.

DEFINITIONS:

Standard Deviation is a statistical concept used in investment management to measure risk for the variability of return of a fund's performance. A high standard deviation represents greater risk.

Sharpe Ratio uses standard deviation to measure a fund's risk-adjusted returns. The higher a fund's Sharpe Ratio, the better a fund's returns have been relative to the risk it has taken on.

Downside Deviation is a risk statistic measuring volatility. It is a variation of Standard Deviation that focuses only upon the "bad" volatility.

Sortino Ratio is a modification of the Sharpe Ratio that differentiates harmful volatility from general volatility by taking into account the Standard Deviation of negative asset returns, called Downside Deviation.

Max Drawdown is an indicator of the risk of a portfolio chosen based on a certain strategy. It measures the largest single drop from peak to bottom in the value of a portfolio (before a new peak is achieved) using month-end data.

BENCHMARK:

Morningstar® Conservative Allocation Category - The Morningstar® Conservative Allocation Category includes income-allocation portfolios that seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. These portfolios tend to hold larger positions in stocks than conservative-allocation portfolios. These portfolios typically have 15% to 30% of assets in equities and the remainder in fixed income and cash.

Bloomberg Municipal Bond Index - An unmanaged index composed of long-term tax-exempt bonds with a minimum credit rating of Baa. It is considered representative of the broad market for investment grade, tax-exempt bonds with a maturity of at least one year.

Morningstar® Moderate Allocation Category - Includes income-allocation portfolios that seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. These portfolios tend to hold larger positions in stocks than conservative-allocation portfolios. These portfolios typically have 50% to 70% of assets in equities and the remainder in fixed income and cash.

ICE BofA US High Yield Index - Tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one-year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$100 million. In addition, qualifying securities must have risk exposure to countries that are members of the FX-G10, Western Europe or territories of the US and Western Europe. Index constituents are capitalization-weighted based on their current amount outstanding times the market price plus accrued interest.

Bloomberg US Aggregate Bond Index - A broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, MBS (agency fixed-rate pass-throughs), ABS and CMBS (agency and non-agency). The index does not take into account charges, fees and other expenses, and investors cannot invest directly in an index.

Bloomberg High Yield Municipal Bond Index - Measures the non-investment-grade and nonrated U.S. dollar denominated, fixed-rate, tax-exempt bond market within the 50 United States and four other qualifying regions (Washington, D.C.; Puerto Rico; Guam; and the Virgin Islands). The index allows state and local general obligation, revenue, insured, and prerefunded bonds; however, historically the index has been composed of mostly revenue bonds.

The currency used to express performance is USD.

Gross-of-fee returns are reduced by trading costs. Returns include the reinvestment of all income. Net-of-fee returns are calculated using a model fee of 1.6%. The annual model management fee is applied on a monthly basis, by deducting 1/12th of the model fee from the monthly gross returns. Because clients will have different fee arrangements and specific investments in the strategy may be made at different times, net performance for any individual client will vary from the net performance as stated herein.

SOURCE OF PERFORMANCE:

Conservative Allocation Strategy:

The source of performance is based on a composite inceptioned January 2, 2004. A portion of the Conservative Allocation Strategy may be allocated to proprietary mutual funds managed by an affiliate of Ocean Park. As of January 1, 2017, the composite was redefined to include a change in the allocations of the proprietary mutual funds.

Strategic Income Strategy:

The source of performance is based on a composite inceptioned on April 1, 2013. A portion of the Strategic Income Strategy may be allocated to proprietary mutual funds managed by an affiliate of Ocean Park.

High Yield Corporate Bond Strategy:

The source of performance is based on a composite inceptioned January 1, 2015. A portion of the High Yield Corporate Bond Strategy may be allocated to proprietary mutual funds managed by an affiliate of Ocean Park.

Municipal Bond Strategy:

The source of performance is based on a composite inceptioned in January 1, 2016. A portion of the Municipal Bond Strategy may be allocated to proprietary mutual funds managed by an affiliate of Ocean Park.

Tactical Bond Strategy:

The source of performance is based on a composite inceptioned in November 1, 2017. A portion of the Tactical Bond Strategy may be allocated to proprietary mutual funds managed by an affiliate of Ocean Park.

Moderate Allocation Strategy:

The source of performance is based on a composite inceptioned July 1, 2021. A portion of the Moderate Allocation Strategy may be allocated to proprietary mutual funds managed by an affiliate of Ocean Park.

IMPORTANT DISCLOSURES:

Past performance is not an indication of future results and there is no guarantee that any investment strategy will achieve its objectives, generate profits, or avoid losses. All investments involve risk, including loss of principal.

You cannot invest directly in an index. Index performance does not represent actual fund or portfolio performance. A fund or portfolio may differ significantly from the securities included in the index. Index performance assumes reinvestment of dividend but does not reflect any management fees, transaction costs or other expenses that would be incurred by a fund or portfolio, or brokerage commissions on transactions in fund shares. Such fees, expenses and commissions could reduce returns.

Advisory services are offered through Ocean Park Asset Management, Inc., a registered investment adviser (“RIA”) regulated by the U.S. Securities and Exchange Commission (“SEC”). The advisory services are only offered in jurisdictions where the RIA is appropriately registered. The use of the term “registered” does not imply any particular level of skill or training and does not imply any approval by the SEC. For information pertaining to the registration status of Ocean Park and Fund, please call 1-844-727-1813 or refer to the Investment Adviser Public Disclosure website (www.adviserinfo.sec.gov).
