

Growth Allocation Strategy

We deploy our tactical, rules-based process across asset classes and spectrums of risk.

- We believe people and portfolios can benefit from the daily, tactical management of assets.
- Rules – not predictions nor emotions – drive our investment decisions.

Our aim is to grow client wealth by focusing on the following objectives:

- Participate opportunistically in global investment uptrends while
- Using our tactical discipline to help limit downside risk.

FOR ILLUSTRATIVE PURPOSES ONLY.

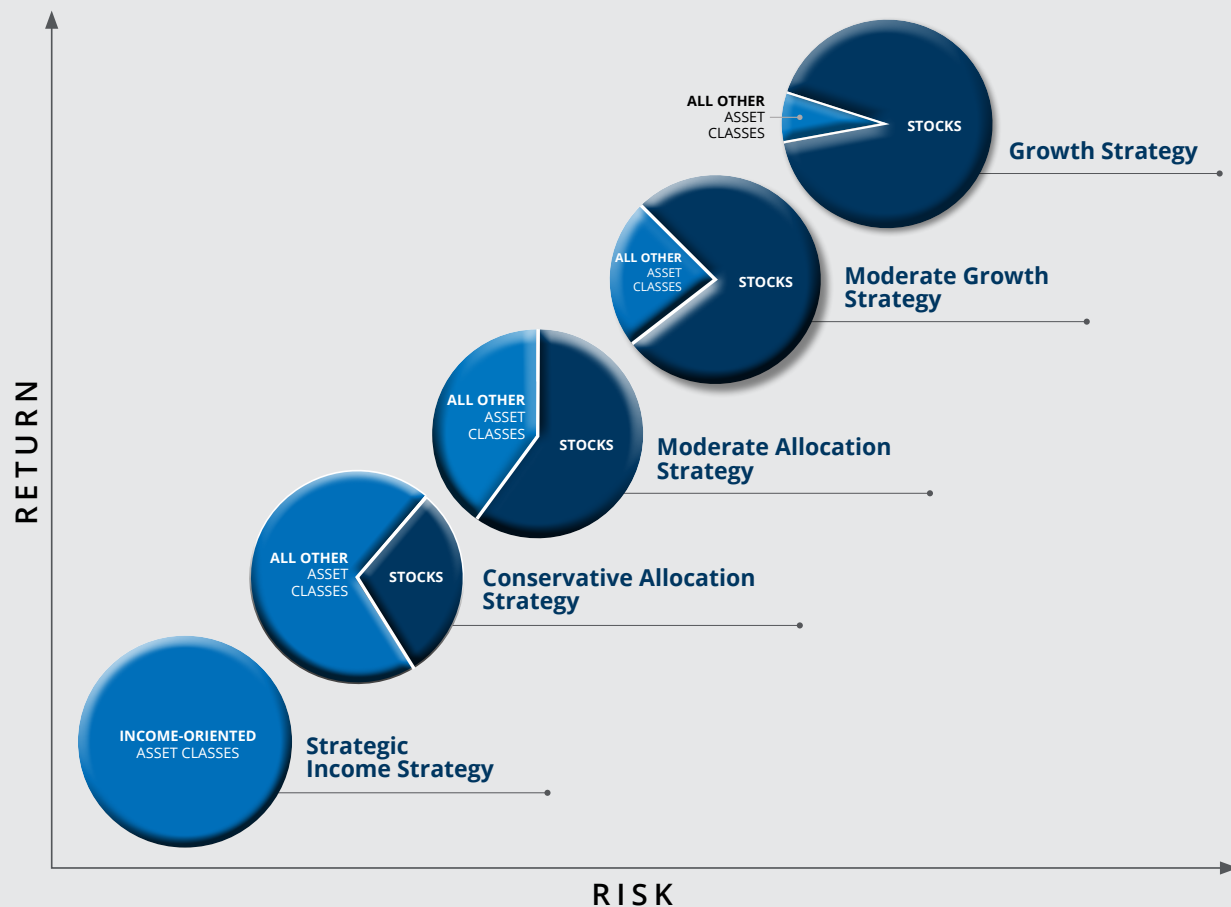

Ocean Park Growth Allocation Strategy has two investment objectives: to provide long-term total return and to limit volatility and downside risk.

The Strategy's multi-asset diversification strategy employs broad diversification across equity and fixed income asset classes, markets, industries, and issuers. A passive "buy and hold" strategy is not employed. The overall asset allocation of the Strategy is tactical, not fixed. It can and does change significantly over time, re-allocating the Strategy in response to trend changes in the U.S. and global investment markets.

As part of Ocean Park's integrated risk-management discipline, the Strategy monitors each non-affiliated holding daily, applying a proprietary trailing stop discipline with the goal of limiting the impact of any further decline in that holding on the overall Strategy. Affiliated Sierra Mutual Fund holdings employ the same trailing stop discipline on the underlying holdings of the Funds.

5 Solutions Engineered for Varying Risk Tolerances

We strive to provide risk management across moderate and conservative investment tolerances.

The Tradeoff Between Risk and Reward: As an investor takes on more investment risk, the potential for greater investment gains increases.
